ORDER NO.

2020-89

THIS DIRECTIVE SHALL SERVE AS THE COMMISSION'S ORDER ON THIS ISSUE.

SUBJECT:

DOCKET NO. 2016-82-E - Application of Duke Energy Progress, LLC Requesting Approval of Its Proposed Residential Energy Assessment Program - Staff Presents for Commission Consideration Duke Energy Progress, LLC's Request for Approval of Modifications to the Residential Energy Assessment Programs.

COMMISSION ACTION:

Duke Energy Progress, LLC requests approval for modifications to their Residential Energy Assessment Programs. The Companies propose modifying these programs to offer additional measures at a reduced cost for those who choose to purchase them at the time of a home energy audit. Specifically, the Companies seek authorization to offer additional measures for sale to the customer directly from the energy specialist at a discounted cost to facilitate customers' ability to follow the energy specialist's recommendations. Duke states such measures could include but are not limited to the following: handheld low-flow showerheads, specialty lighting, recessed LED bulbs, and smart thermostats. Each of these measures will be installed during the in-home assessment.

Duke maintains that adding the availability of additional measures to the Programs should increase the overall cost-effectiveness of the program by adding savings opportunities at minimal cost to the customer.

In addition, Duke also proposes to add a provision to the tariffs clarifying that any current and future environmental, energy efficiency, and demand reduction benefits and attributes, including all reporting and compliance rights, will be retained by the Companies in consideration of the incentivized discount purchase price.

The Office of Regulatory Staff has reviewed this matter and does not oppose granting the requests.

I move that we approve the request as well as the added provisions to the tariff.
